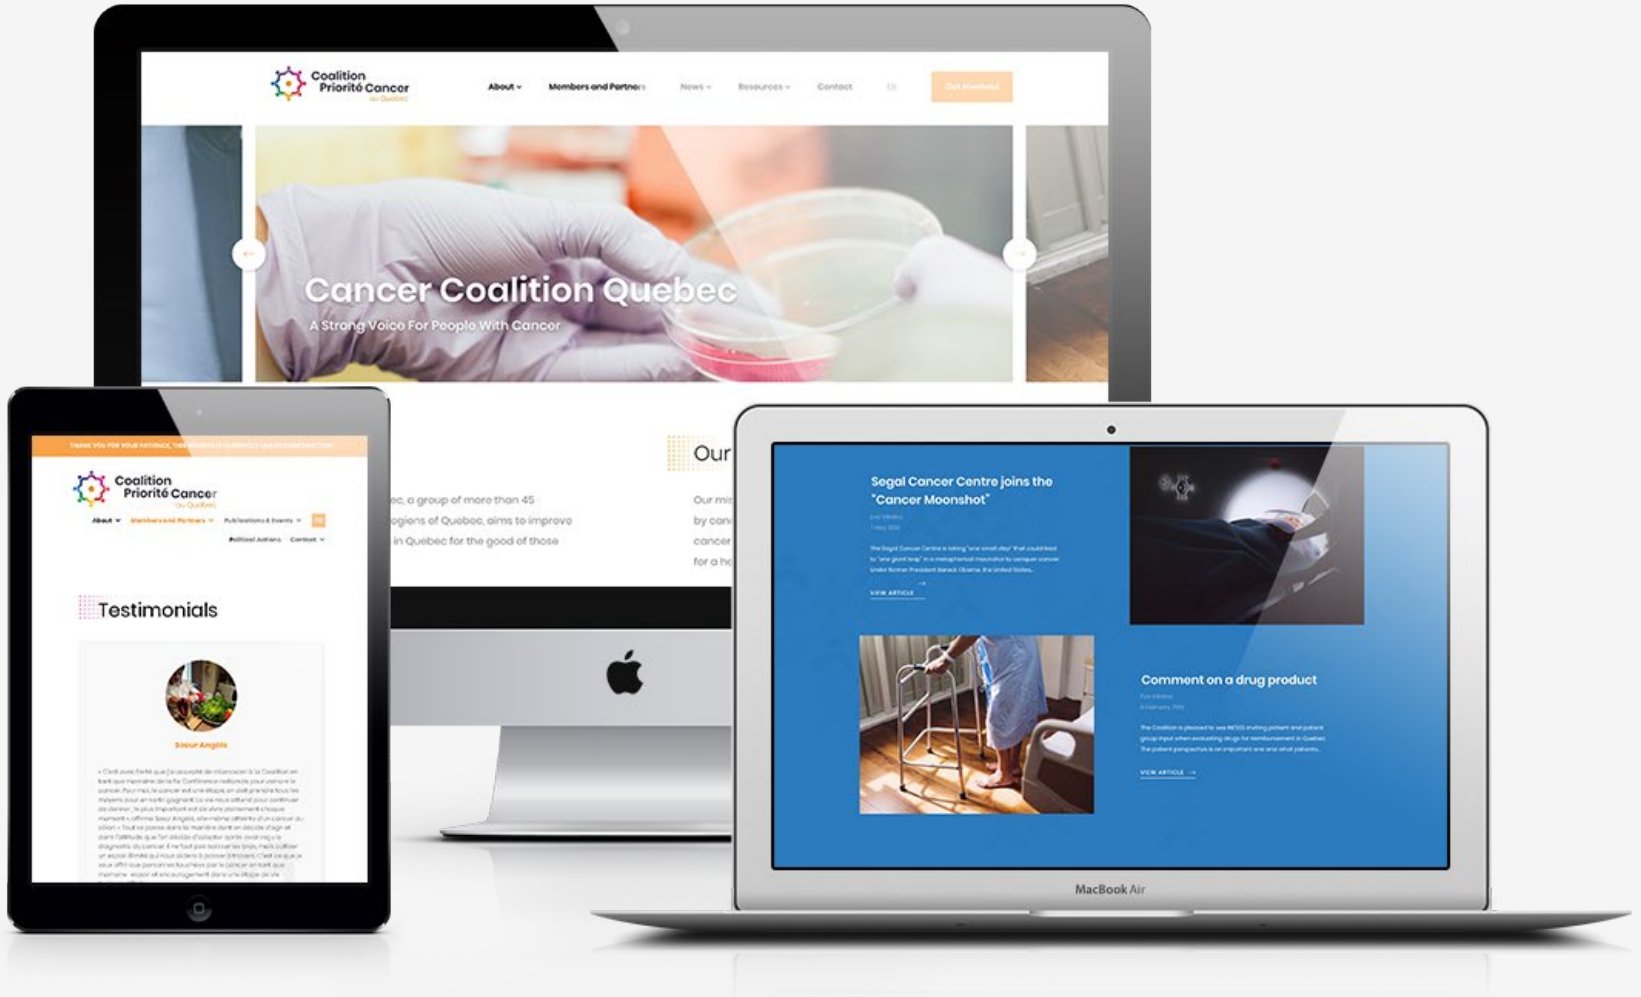
Custom Site Development
- Advanced Customized Integrations
- Development of Connector for 3rd Party App
- UI/UX Design

The Jewish Public Library (JPL) required a site that would reduce the gap of educational and recreational needs of the Jewish community in Montreal as well as across the Province of Quebec.

The site was developed using a Headless Content Management System. Custom Integrations were built to connect service providers that provide access to periodicals and books online. A unique integrator was developed to connect their backoffice software called Raisers-Edge from Blackbaud to the libraries CMS.

Quebec
Cancer Coalition



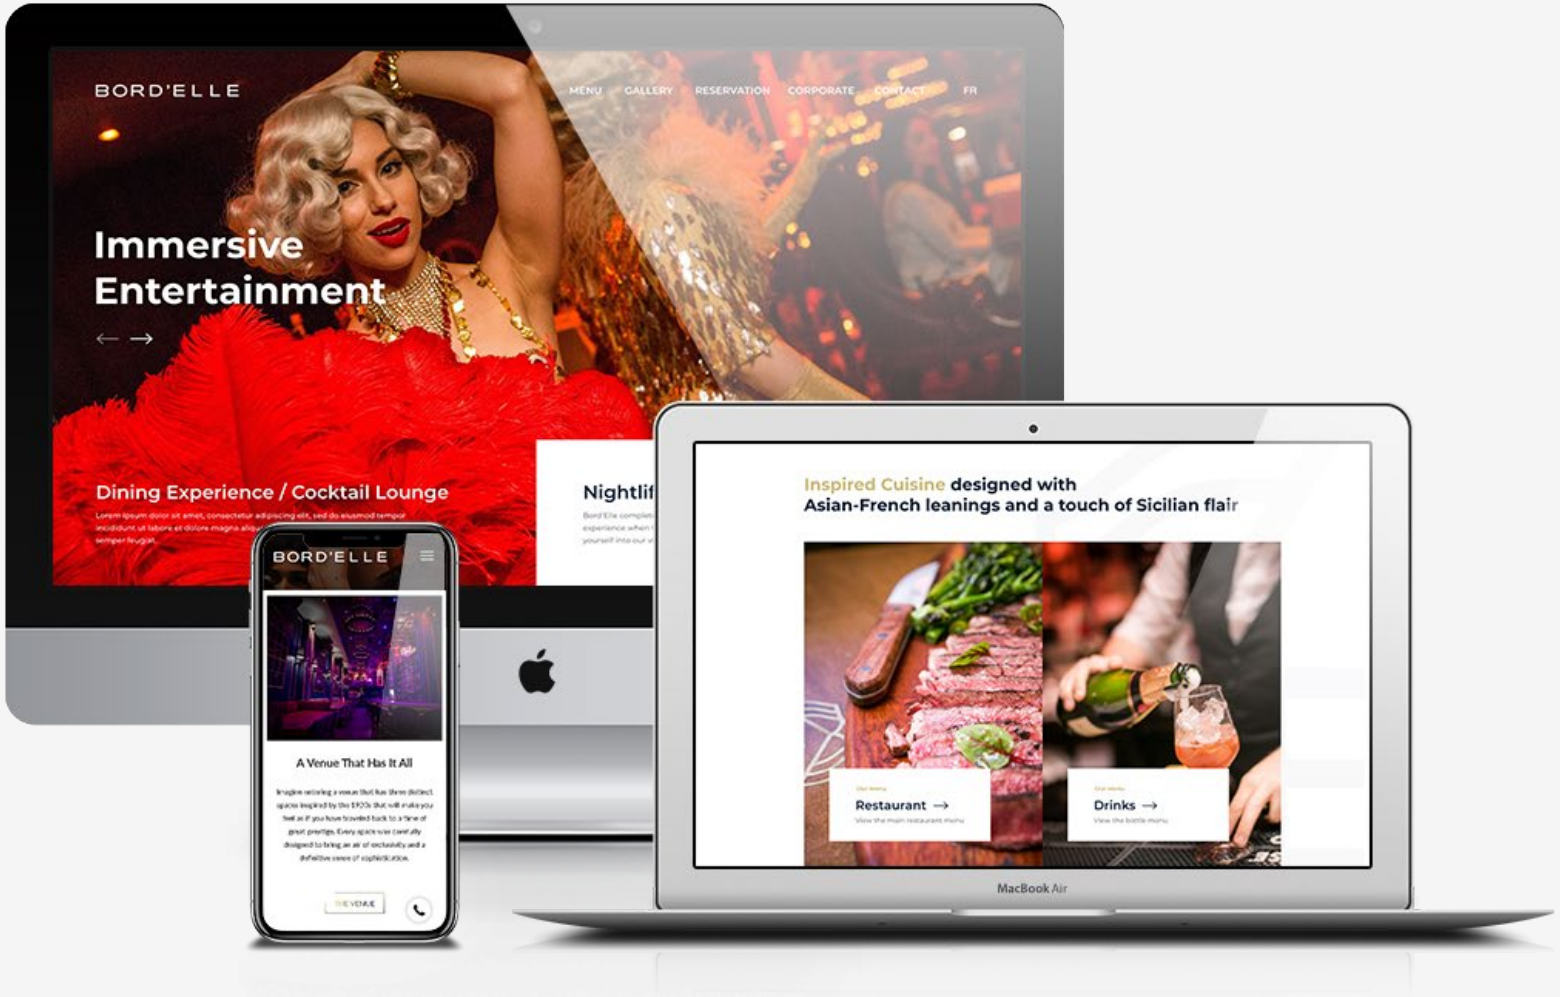
Web Design
- UI/UX
- Content Pagination

Cancer Coalition Quebec is an organization comprised of over 45 groups in Quebec.

The website was designed as an informational tool, with the goal of being inclusive for people of all backgrounds who have been affected by cancer.

The site was designed to be intuitive for users, and simplified for editors to mange via a Visual Editor

BORD'ELLE
BOUTIQUE BAR AND EATERY



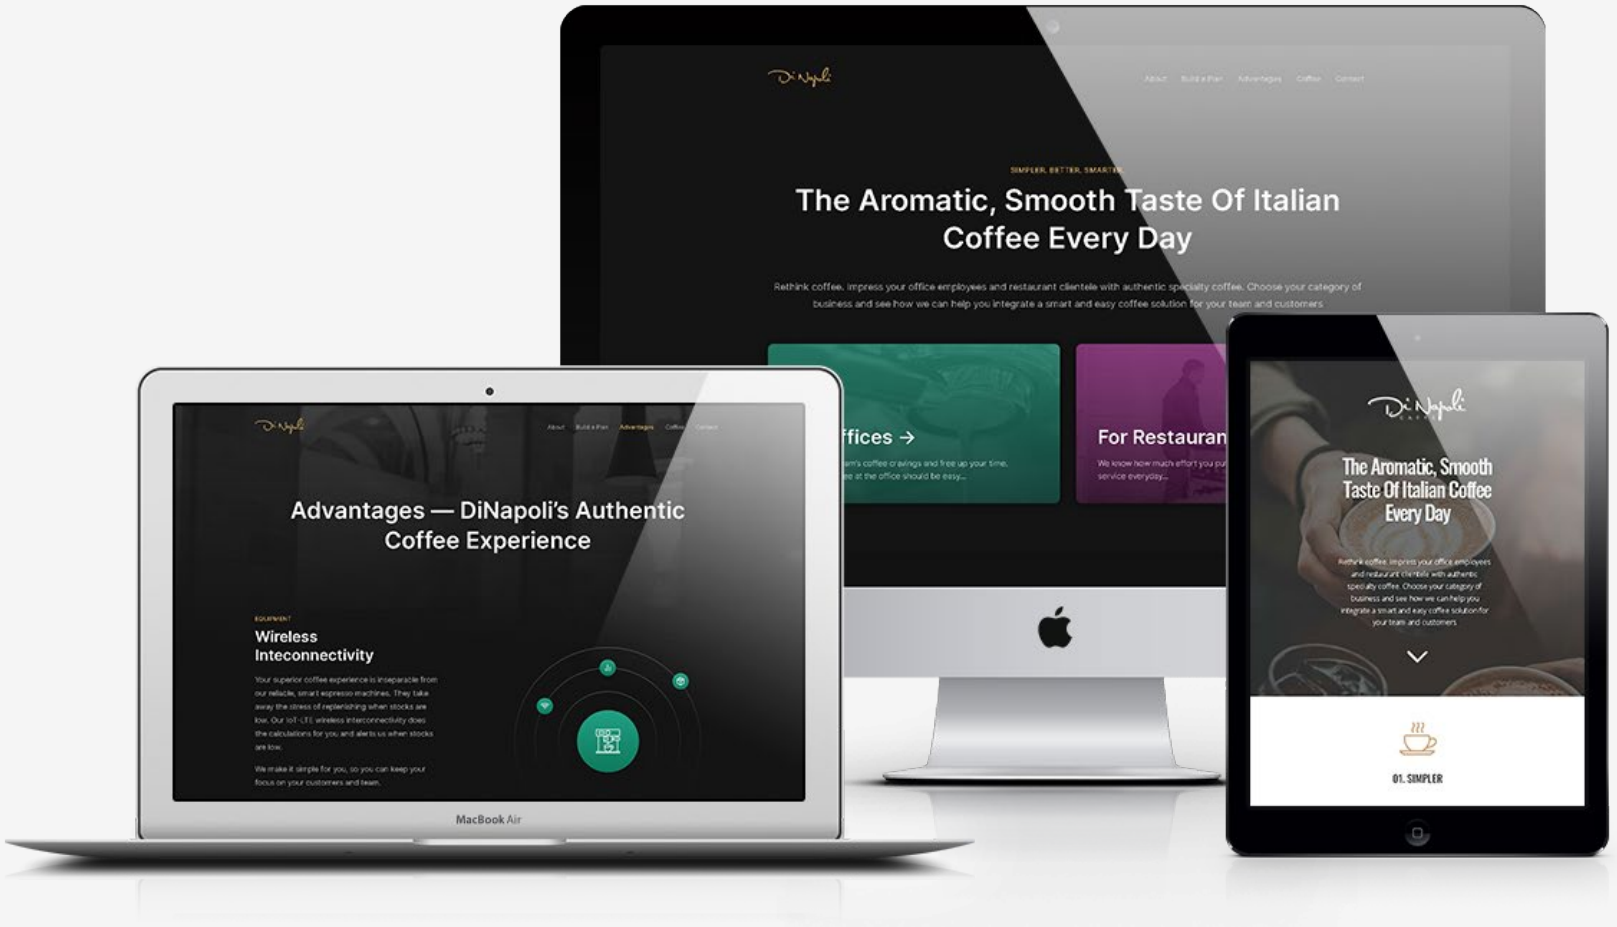
Web Design
- UI/UX
- Content Pagination

Bord'Elle is a local Montreal eatery and entertainment venue featuring high-flying dancers and performers in an upscale setting. The goal of the website was to showcase their inspired cuisine, immersive entertainment, and cocktail lounge.

We developed a website design that was visually appealing for their target market, and easy to edit for the client using a visual editor.

CAFFE

Di Napoli

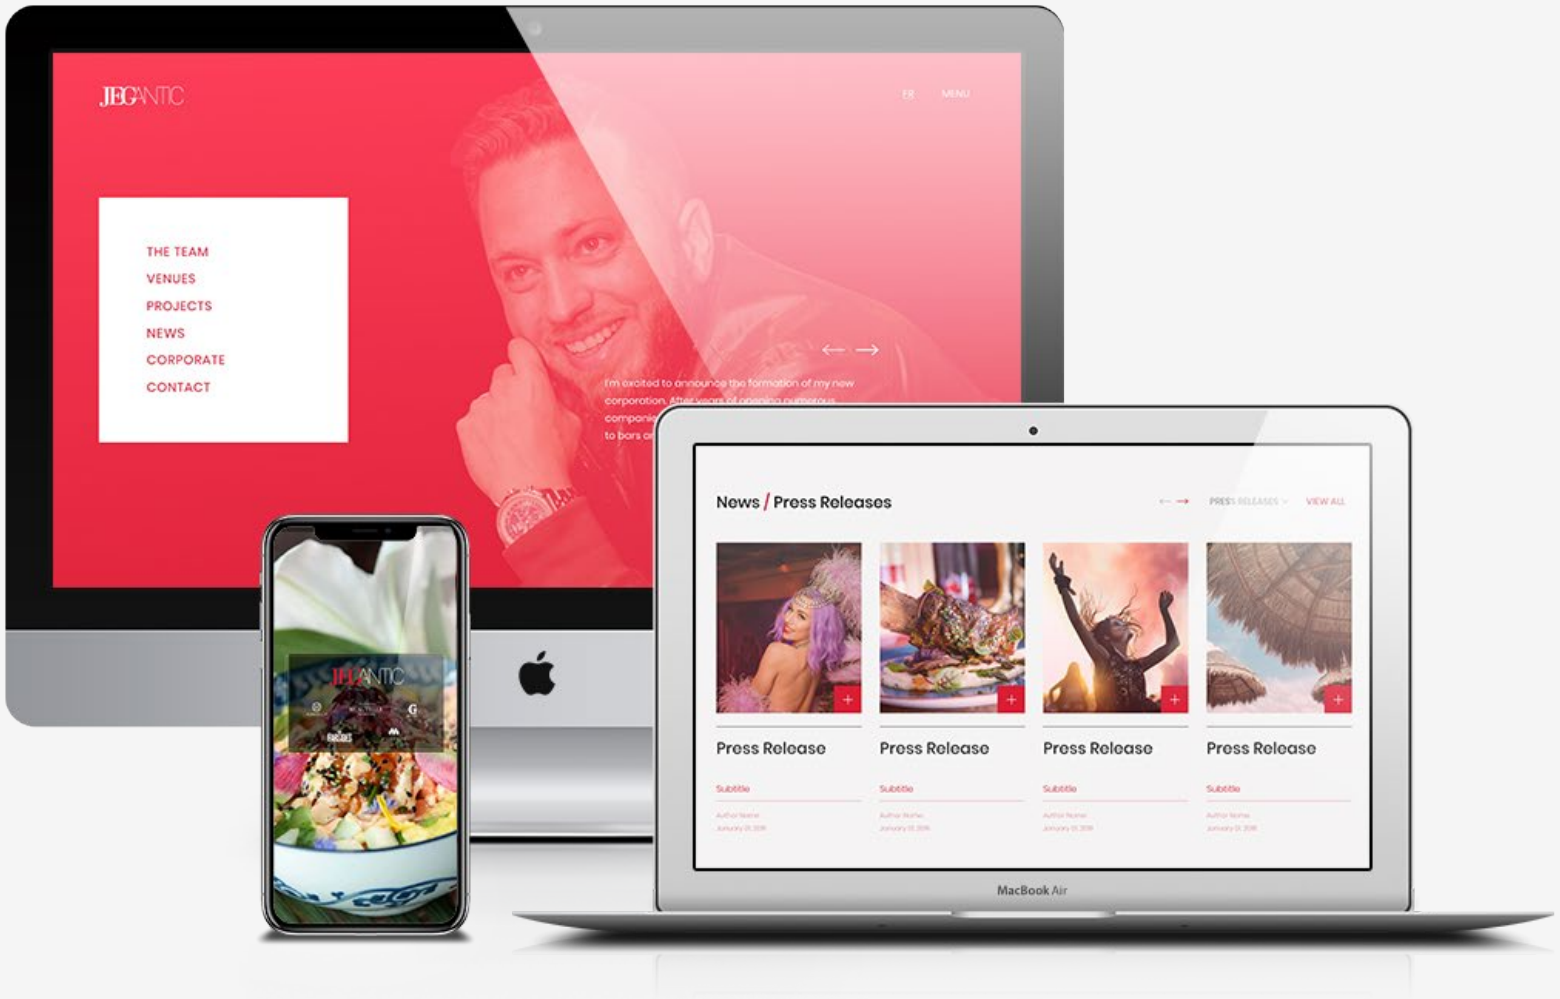


Web Design
- UI/UX Design
- Headless WordPress Development
- Custom Integration Development

The design of DiNapoli Caffè's website depicts the exclusiveness of their premium espresso brand through the use of dark, rich colors – just like their coffee.

We developed an easy to update site for the client, and created a custom quoting plugin that was integrated directly into the site code.

JEGANTIC



Web Design
- UI/UX
- Content Pagination

JEGantic is the parent company of a number of Montreal area hospitality brands. JEGantic features an eclectic portfolio of hotels, night clubs, and restaurants.

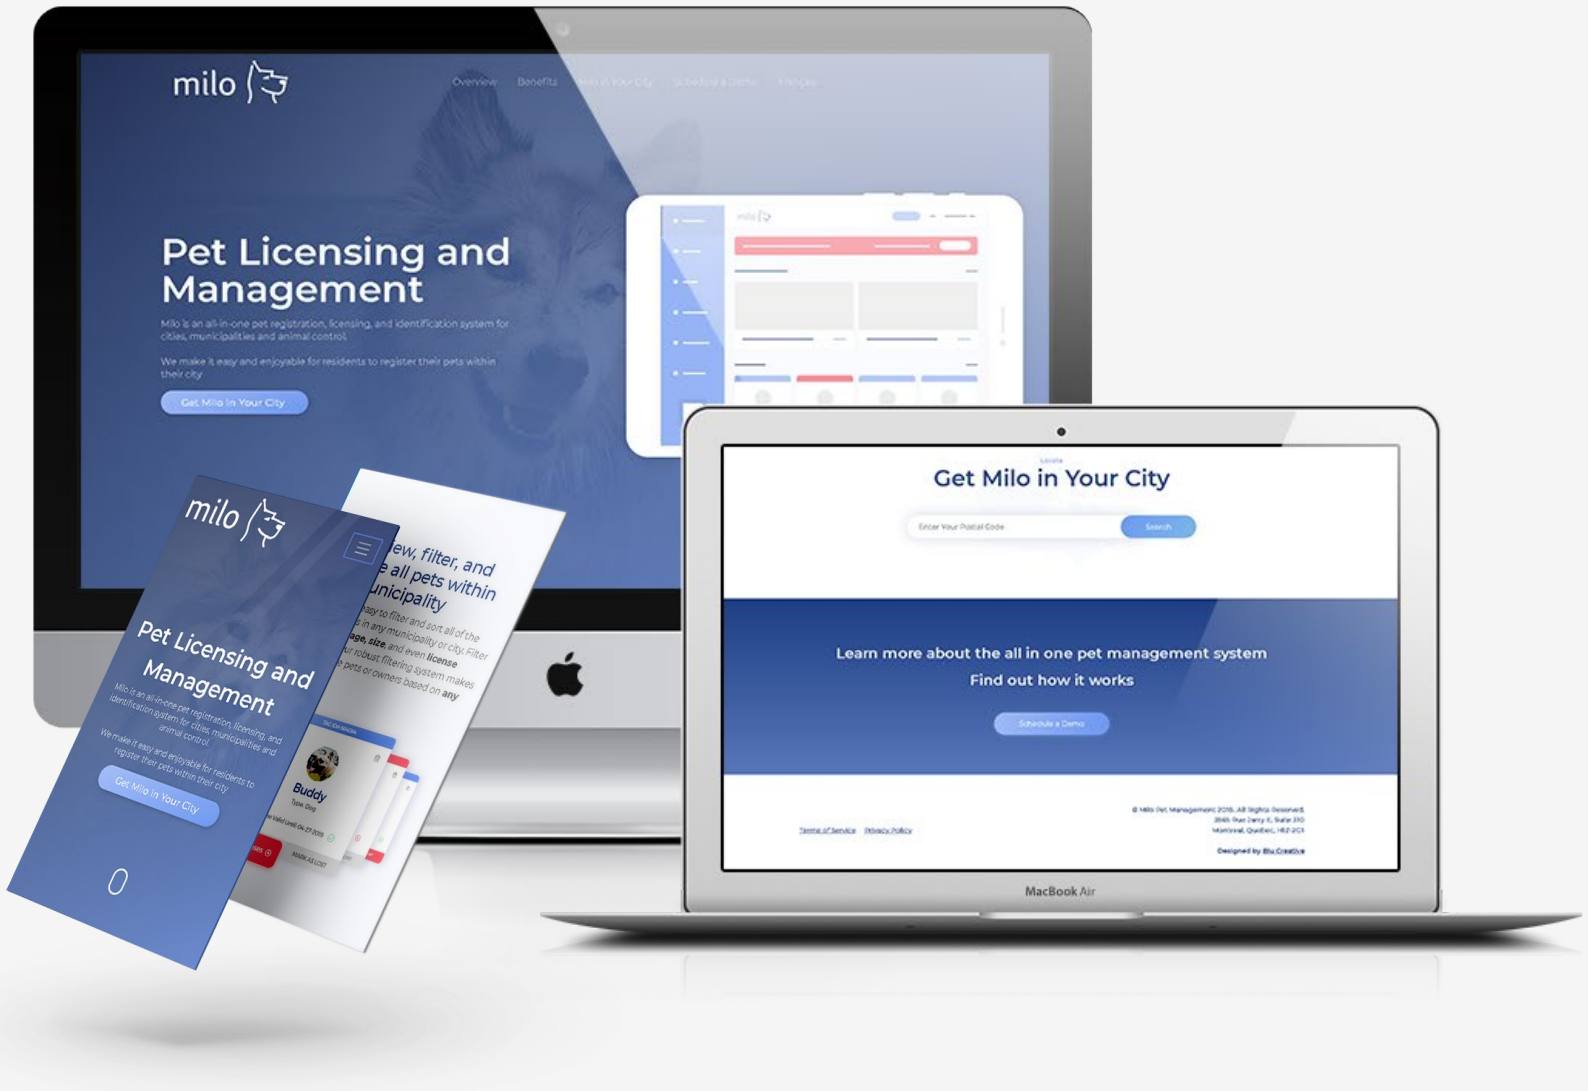
The website was designed to deliver information on the venues and team details for all JEGantic's properties.

15weeks

Web Development
- Custom Cloud-Based PHP Application
- UI/UX Design
- High-Traffic Volume Scalable Hosting

15 Weeks (15 Semaines) was an online petition campaign where users could digitally sign an online petition for an increased employment insurance benefit for cancer sufferers.
All signed petitions would automatically be sent to their geographically identified local Member of Parliament, identified by the postal code of the user, as well as Ministers responsible for this file.

milo



Web Development
- **Custom Cloud-based Laravel Application**
- **UI/UX Design**
- **Management of hosting on Digital Ocean**
- **Ongoing Management of Application**

Milo is a municipal software for pet licensing and management. Built for municipalities across Canada, Milo features a simple and intuitive user interface for users of all ages.
